#Question I

"" Requête SQL : "SELECT idpatient FROM MEDICAL WHERE etat = 'hernie discale'" ""

#Question II

"" Requête SQL : "SELECT PATIENT.nom, PATIENT.prenom FROM PATIENT JOIN MEDICAL ON PATIENT.id = MEDICAL.idpatient WHERE MEDICAL.etat = 'spondylolisthésis'" ""

#QUESTION III

"" SELECT etat, COUNT(etat) FROM MEDICAL GROUP BY etat ""

#QUESTION IV

"" Cela permet, lorsque les tableaux sont de grandes tailles d'effectuer des operations plus facilement. ""

#QUESTION V

"" Memoire pour le tableau : $32 \times 6 \times 100\,000 \text{ bits} = 2,4 \cdot 10^6 \text{ Octets}$

Memoire pour le vecteur : $8 \times 100\,000 \text{ bits} = 1,0 \cdot 10^5 \text{ Octets}$

Donc la quantité de memoire totale est de 2,5 Mo. ""

A handwritten red mark, possibly a signature or a stylized 'N', is located to the right of the code blocks. It consists of a series of loops and a long, sweeping underline.
